

THE UNIVERSITY OF HONG KONG**Bachelor of Biomedical Sciences (BBiomedSc)
Minor in Pharmaceutical Sciences
Credit Unit Statement**

All the courses in the Minor in Pharmaceutical Sciences of the Bachelor of Biomedical Sciences curriculum are lecture courses. All of them are of 6-credit, each embracing 150 hours of student learning activity (including both contact hours and all other forms of student learning activity). The course type specification is summarized as follows:

Lecture Courses (6 credits each)

These courses focus on content, including theories and concepts of various pharmaceutical sciences areas such as biochemistry, pharmacology, organic chemistry and so on. They are taught predominantly by lectures (typically 36 hours), with most being supplemented by tutorials (typically 12 hours) and/or laboratory practicals (typically 12 hours). Assessment is conducted through continuous assessment (30%–60%), including tests, assignments, reports, group discussions, presentations and performance in class, and written examinations (40%–70%). Outputs may include test performance, presentations and assignments with the range of word requirement from 500–3,000 words.
