

THE UNIVERSITY OF HONG KONG
FACULTY OF ENGINEERING
Department of Computer Science

Major in Computer Science under BBA(IS): Programme Level Learning Outcomes
(academic plan: 5U721J)

Programme Level Outcomes	University Educational Aims
<p>Upon successful completion of the programme, students should be able to:</p> <p>(1) apply knowledge of computing and mathematics appropriate to the programme outcomes and to the discipline</p> <p>(2) apply knowledge of a computing specialization, and domain knowledge appropriate for the computing specialization to the abstraction and conceptualization of computing models</p> <p>(3) analyze a problem, and identify and define the computing requirements appropriate to its solution</p> <p>(4) design, implement, and evaluate a computer-based system, process, component, or programme to meet desired needs with appropriate consideration for public health and safety, social and environmental considerations</p> <p>(9) use current techniques, skills, and tools necessary for computing practice with an understanding of the limitations</p>	<p>University Educational Aim 1.</p> <ul style="list-style-type: none"> • Benchmarked against the highest international standards, the 4-year undergraduate curriculum at HKU is designed to enable our students to develop their capabilities in pursuit of academic/professional excellence, critical intellectual enquiry and life-long learning
<p>Upon successful completion of the programme, students should be able to:</p> <p>(3) analyze a problem, and identify and define the computing requirements appropriate to its solution</p> <p>(9) use current techniques, skills, and tools necessary for computing practice with an understanding of the limitations</p>	<p>University Educational Aim 2.</p> <ul style="list-style-type: none"> • Benchmarked against the highest international standards, the 4-year undergraduate curriculum at HKU is designed to enable our students to develop their capabilities in tackling novel situations and ill-defined problems
<p>Upon successful completion of the programme, students should be able to:</p> <p>(6) demonstrate an understanding of professional, ethical, legal, security and social issues and responsibilities</p> <p>(8) analyze the local and global impact of computing on individuals, organizations, and society</p>	<p>University Educational Aim 3.</p> <ul style="list-style-type: none"> • Benchmarked against the highest international standards, the 4-year undergraduate curriculum at HKU is designed to enable our students to develop their capabilities in critical self-reflection,

Programme Learning Outcomes of
Major in Computer Science under BBA(IS)
(academic plan: 5U721J)

Upon successful completion of the programme, students should be able to:

- 1) apply knowledge of computing and mathematics appropriate to the programme outcomes and to the discipline
- 2) apply knowledge of a computing specialization, and domain knowledge appropriate for the computing specialization to the abstraction and conceptualization of computing models
- 3) analyze a problem, and identify and define the computing requirements appropriate to its solution
- 4) design, implement, and evaluate a computer-based system, process, component, or programme to meet desired needs with appropriate consideration for public health and safety, social and environmental considerations
- 5) function effectively on teams to accomplish a common goal
- 6) demonstrate an understanding of professional, ethical, legal, security and social issues and responsibilities
- 7) communicate effectively with a range of audiences
- 8) analyze the local and global impact of computing on individuals, organizations, and society
- 9) use current techniques, skills, and tools necessary for computing practice with an understanding of the limitations
